Vol. 01

flexi

Every space works differently.

Some environments need quiet corners for focused work. Others benefit from places where people can exchange ideas, meet informally or simply step away from the pace of the day.

Flexi is a collection of acoustic workspace elements designed to shape interiors with greater freedom. Using a family of upholstered screens and integrated workstations, the collection helps define zones, improve comfort and bring structure to open-plan environments.

From individual study booths and compact workstations to collaborative layouts and larger clustered arrangements, Flexi offers a consistent design language across a wide variety of applications.

Flexible by design. Adaptable by nature.

Designed by 2020FD.

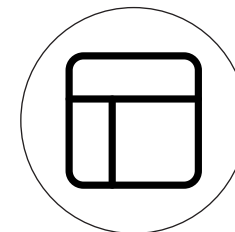

Crafted with care. Designed for people.

The best working environments are rarely built around a single way of working. They support moments of concentration, collaboration, learning and interaction throughout the day.

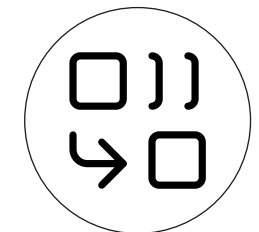

Flexi was created to provide designers with a versatile toolkit for organising space without restricting it. The collection introduces definition and privacy while maintaining the openness and flow that contemporary interiors demand.

A broad range of forms, dimensions and configurations allows each setting to respond to its own requirements. Whether creating a quiet destination for individual work or establishing larger team-based layouts, Flexi adapts effortlessly to changing needs.

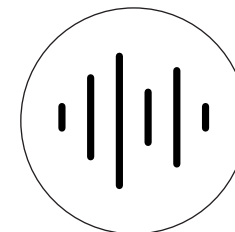

Each element is designed to work independently or as part of a larger composition, giving specifiers the freedom to create environments that feel coherent, functional and welcoming.

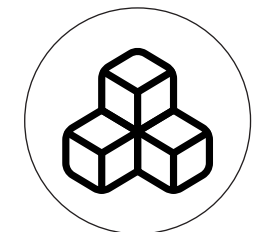

Creates clear spatial boundaries without permanent construction.

Multiple formats and layouts provide extensive planning flexibility.

Helps support quieter, more comfortable working environments.

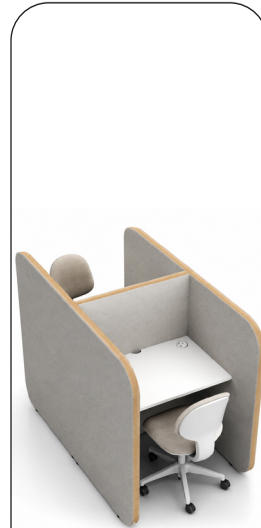

Designed to work individually or as part of a complete workspace system.

flexi

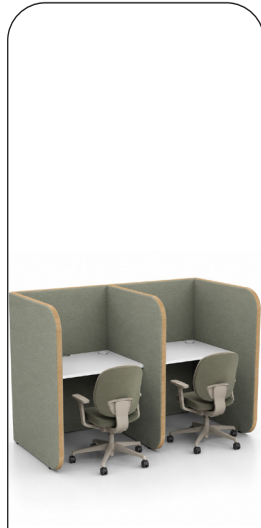

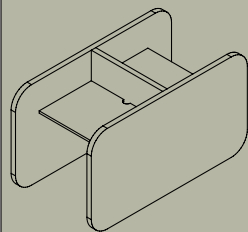

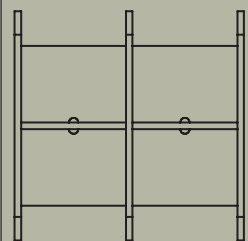

Flexi Family.

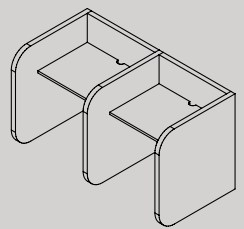

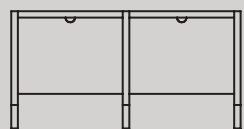

Many products. One design language. The Flexi collection offers a complete acoustic screening system for every scenario - from solo focus pods to collaborative clusters. Mix, match and configure to suit any space.

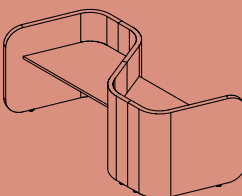

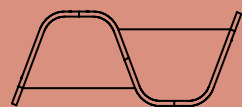

FACE TO FACE

FURNITURE DESIGN

Connect. Collaborate. Face to Face.

Flexi Face to Face brings two individual workstations together, positioning users directly opposite one another within a shared acoustic screen structure.

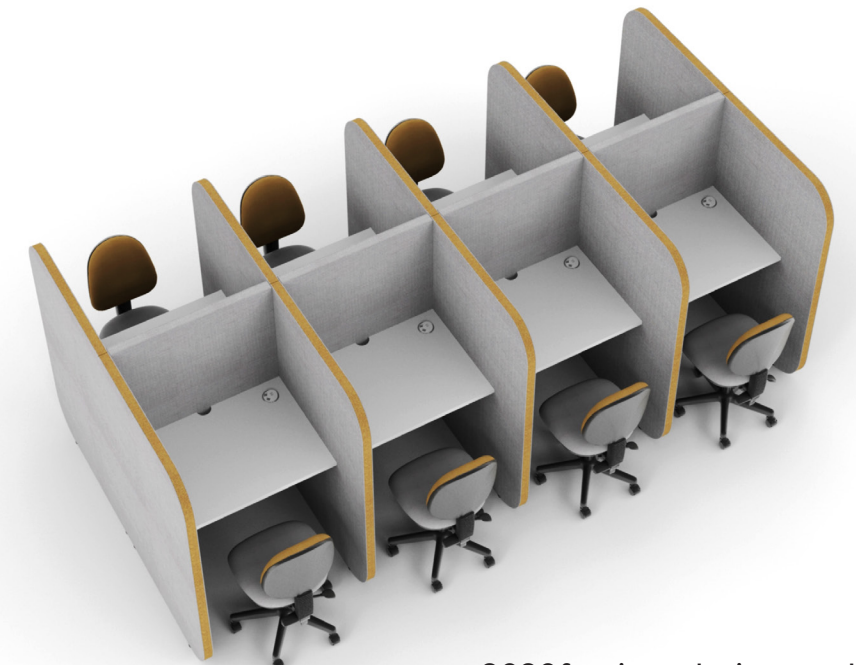

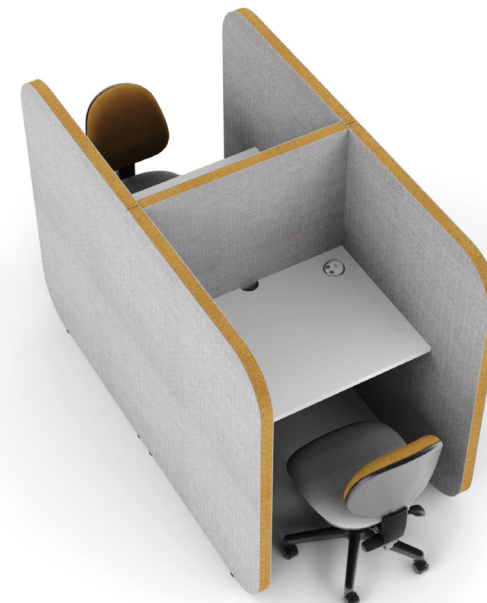

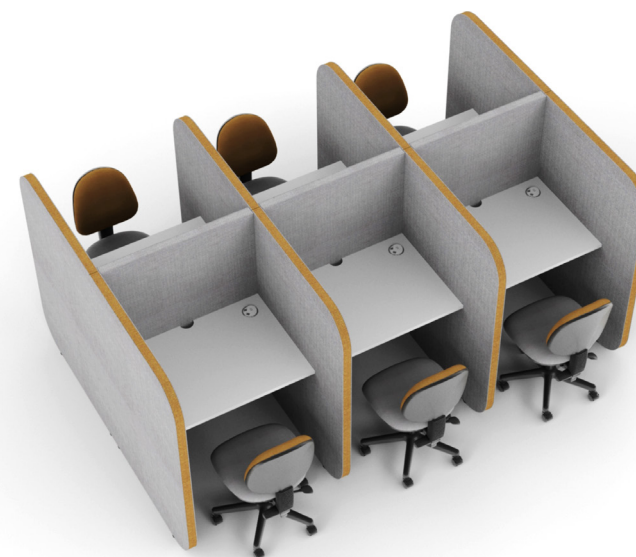

Designed for collaborative environments where communication matters, F2F creates semi-private, paired working without fully enclosing the space.

Upholstered screens run along both sides and between users, reducing ambient noise and visual distraction while encouraging natural interaction.

An integrated desk surface runs the full length of each side, with built-in port holes for clean cable and power management.

An optional **port hole** can also be specified within the screen panel for additional routing flexibility.

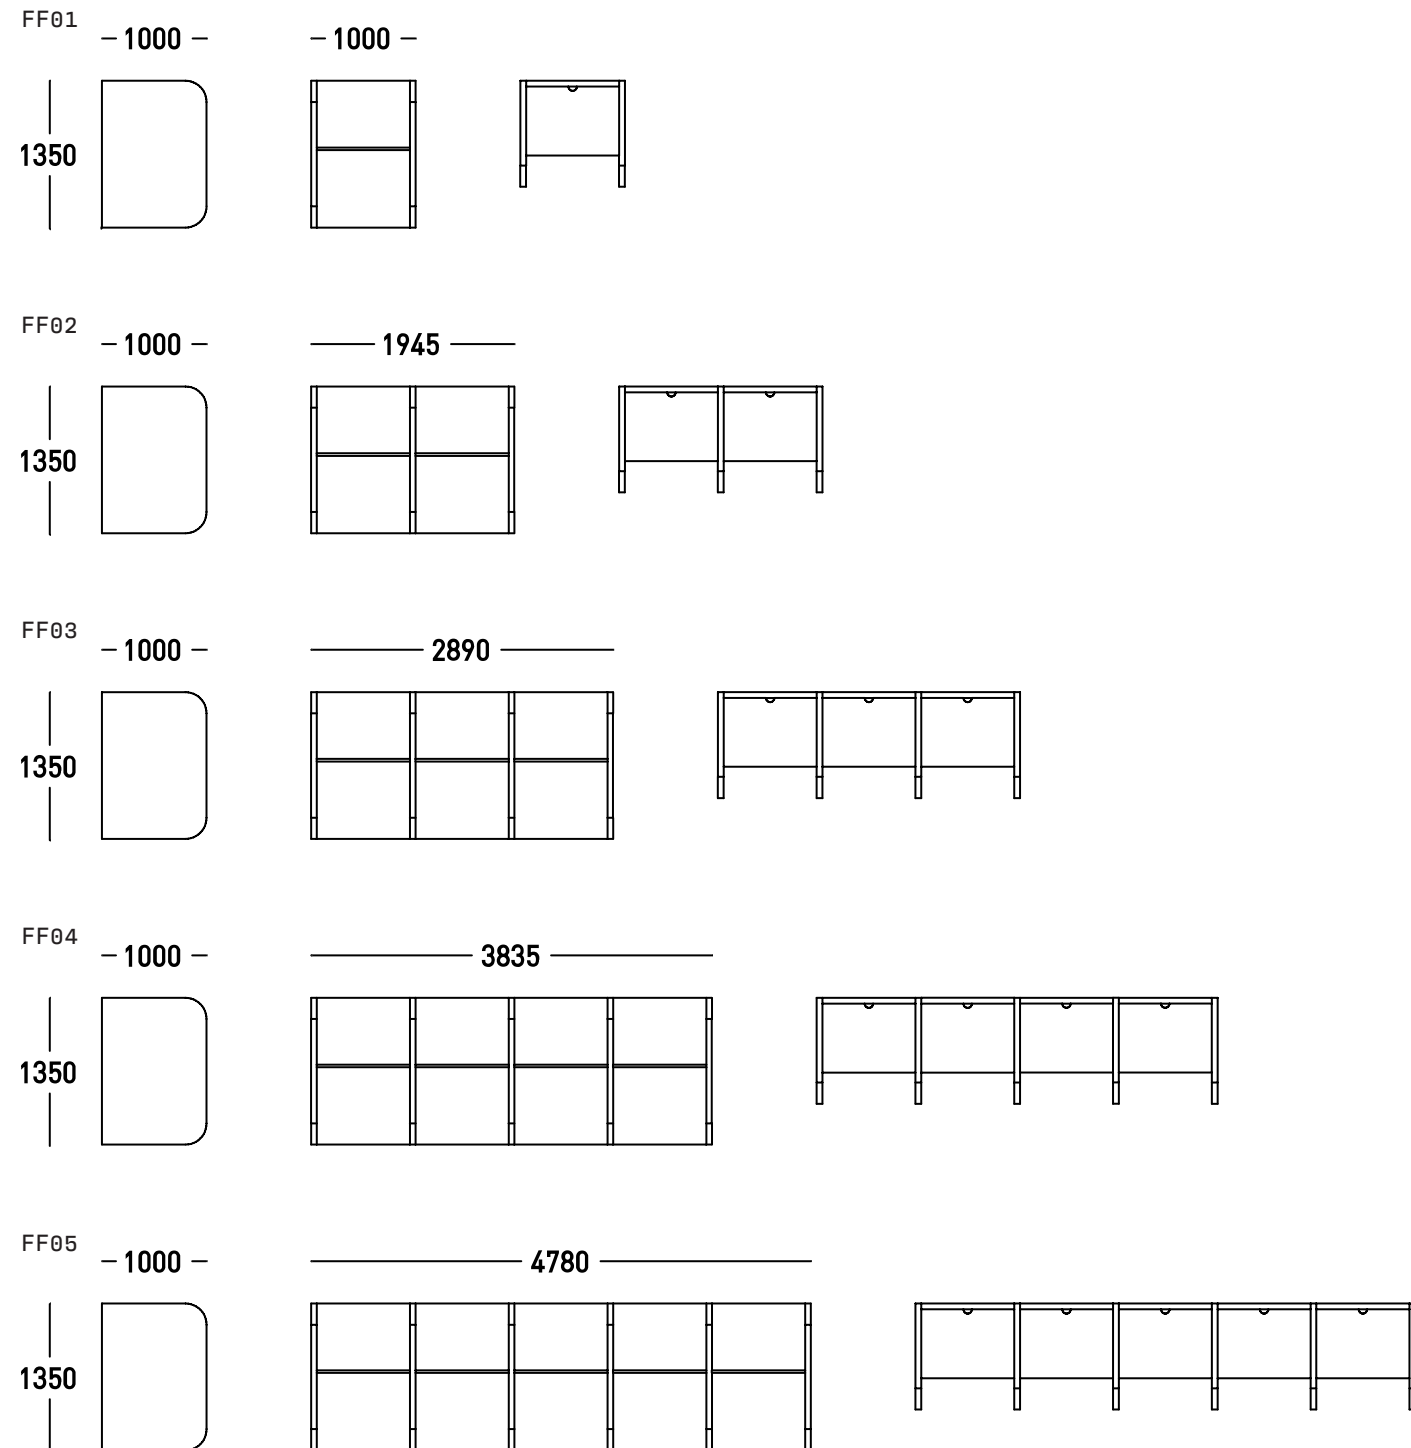

Available in screen heights of **1100mm** or **1350mm**. With a wide choice of upholstery fabrics and configurations from single pairs to long linear runs, Face to Face is ideal for hot-desking environments, universities and dynamic office spaces.

flexi

Focus Collection

Focus. Achieve. Perform.

Flexi Focus is a linear acoustic screening system designed to create individual, distraction-free workstations in open-plan environments.

Upholstered screens sit side by side, softly dividing space while maintaining a cohesive, open feel.

Each workstation features an integrated desk surface with a built-in **port hole** - allowing cable management to pass cleanly beneath the table, keeping the workspace tidy and clutter-free.

An optional **port hole** can also be specified within the screen panel itself, providing additional flexibility for power and data routing.

Available in screen heights of **1100mm** or **1350mm**, Flexi Focus adapts to suit different levels of privacy and acoustic performance.

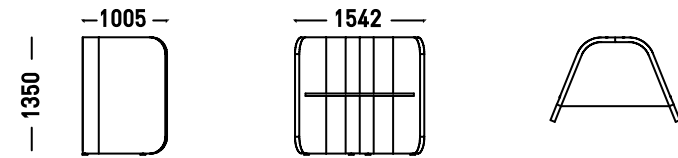

With a wide choice of upholstery fabrics and almost endless linear configurations, Focus is the ideal solution for libraries, universities, corporate offices and any space requiring focused, individual work.

FLE POD 02

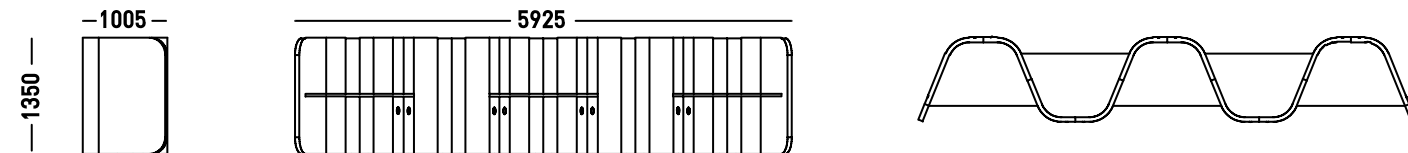

FLE POD 03

FLE POD 04

FLE POD 05

Escape. Focus. Deliver.

Flexi Pod is a fluid, wave-form acoustic workstation that wraps around a single user in a continuous curved screen.

The distinctive transverse wave shape creates a naturally enclosed environment - providing acoustic comfort and visual privacy without the rigidity of a straight-edged screen.

Its organic, flowing form works equally well as a standalone feature piece or arranged in a continuous run of two, three or more units.

Each pod includes a fully integrated desk surface with a built-in port hole for clean cable and power management beneath the table.

An optional **port hole** within the screen panel provides additional flexibility for power and data routing.

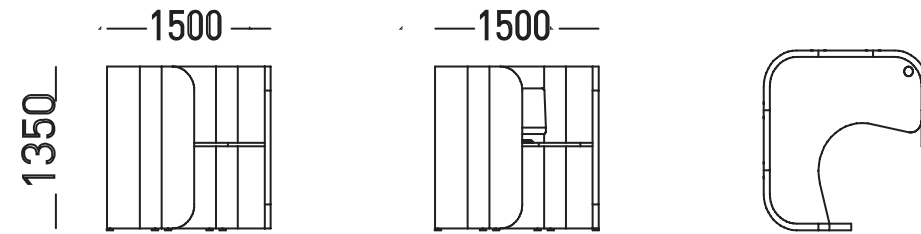

Available in screen heights of **1100mm or 1350mm**, with an extensive range of upholstery fabrics and finishes. **Flexi Pod** is perfect for any space where focused individual work meets considered, characterful design.

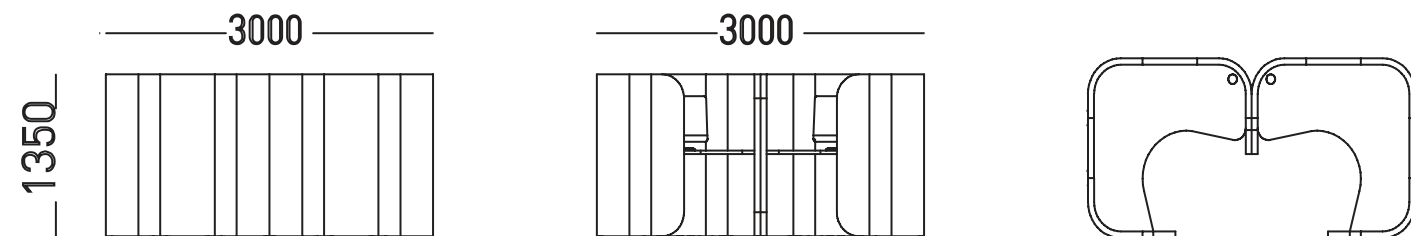

flexi

Square Collection

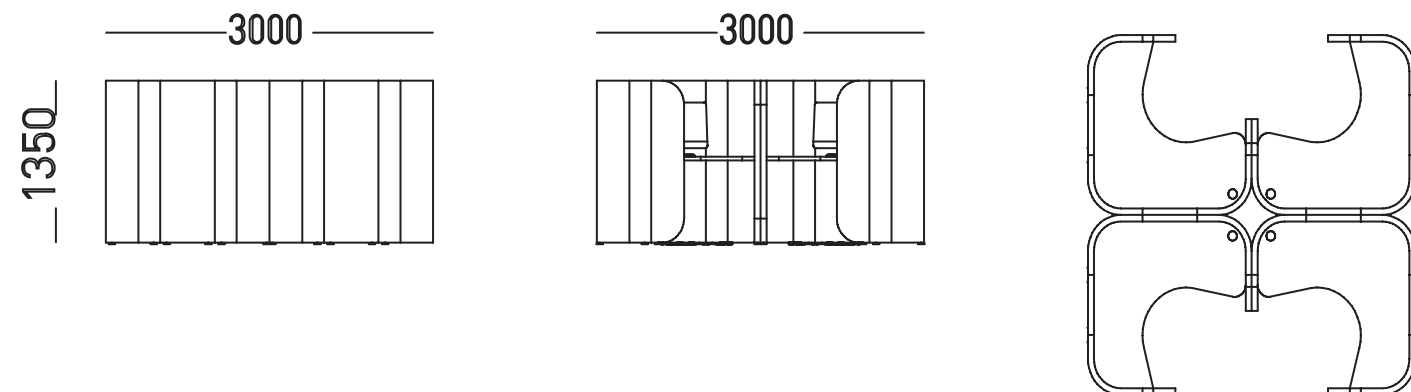

FLE SQU 01

FLE SQU 02

FLE SQU 03

Private. Focused. Your Space.

Flexi Square is an individually enclosed acoustic workstation designed to offer maximum privacy for a single user.

Its square-form upholstered structure wraps around the user on three sides, creating a personal and focused environment within any open-plan space - without permanent walls or partitions.

Clean, architectural lines give **Flexi Square** a strong visual presence while soft upholstered panels absorb ambient sound, delivering a noticeably quieter working environment.

A fully integrated desk surface sits within the enclosure, complete with a built-in **port hole** for discreet cable and power management.

An optional port hole within the screen panel provides further routing flexibility. Available in screen heights of **1100mm or 1350mm**, with a wide selection of upholstery fabrics and finishes.

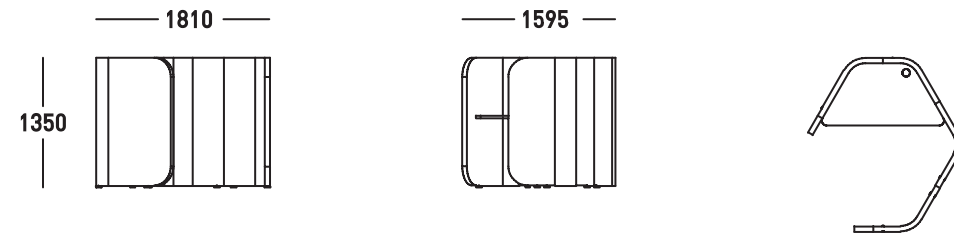

Flexi Square is the ideal solution for corporate offices, libraries and shared workspaces where focused, individual work is the priority.

Hex Collection

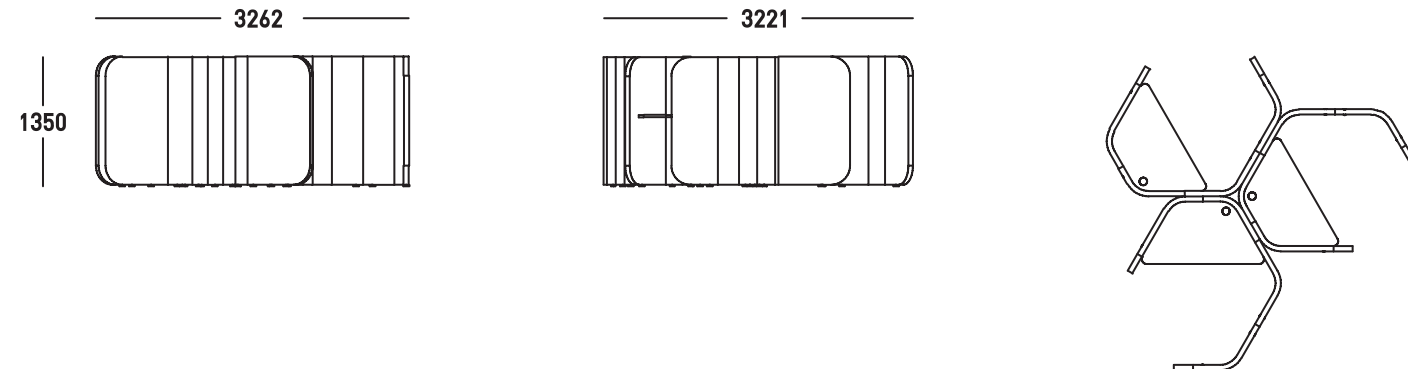

FLE HEX 01

FLE HEX 02

FLE HEX 03

Stand Out. Focus In.

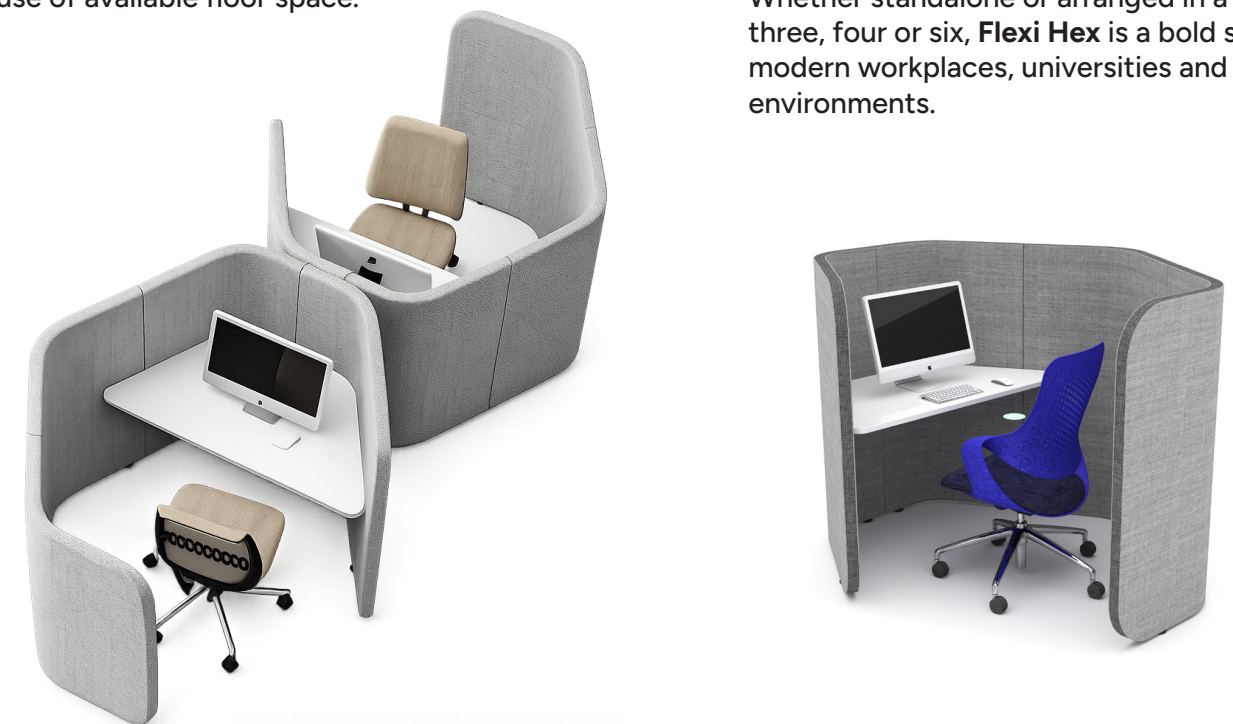

Flexi Hex redefines the individual workstation with its distinctive hexagonal form. Designed for a single user, the upholstered hex-shaped screen wraps around the workspace, offering excellent acoustic privacy and a striking visual presence.

Its unique geometry allows multiple units to cluster together organically, interlocking side by side to make efficient and visually impressive use of available floor space.

Each unit includes a fully integrated desk surface with a built-in **port hole** for clean cable and power management. An optional port hole within the screen panel provides additional routing flexibility.

Available in screen heights of **1100mm** or **1350mm** with a wide choice of upholstery fabrics and finishes.

Whether standalone or arranged in a cluster of three, four or six, **Flexi Hex** is a bold solution for modern workplaces, universities and creative environments.

Choose your own

Our upholstery collection is structured to provide clarity and flexibility in material selection. Fabrics are divided into two categories: Band 1 and Band 2, allowing projects to meet both aesthetic and performance requirements.

Band 1 offers a versatile range of high-quality fabrics that balance durability, functionality, and visual appeal. These materials deliver reliable performance with a refined finish. Band 2 features a selection of premium textiles with richer textures, enhanced tactility, and expanded color options-ideal for more sophisticated interiors.

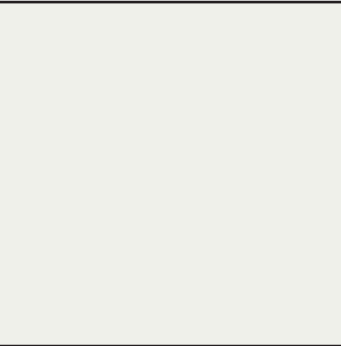

The collection also includes screen fabrics for vertical applications such as acoustic panels and privacy screens, ensuring both performance and visual consistency.

Selected finishes are available in vinyl, offering resistance to moisture, staining, and intensive use-ideal for high-traffic environments requiring easy maintenance without compromising design quality.

Our products are built using carefully selected materials that combine visual quality with functional performance. We utilize MFC boards along with layered, sound-absorbing structures and soft textile finishes to help reduce unwanted sound reflections from surrounding surfaces such as walls, furniture, and glazing.

The material composition is designed to support speech clarity and everyday comfort, minimizing background noise and improving the overall acoustic experience of the space.

Choose your own

You can choose from a wide range of finishes and material options to match your project's character and design direction. We use a selection of high-quality MFC boards from trusted suppliers, ensuring durability, consistency, and a refined appearance across all elements.

In addition to the standard finishes, custom materials and colors can be provided upon request. For larger or more specific projects, we are able to source and prepare tailored solutions based on the client's needs and preferred aesthetics.

Before you order

General

- By placing an order with 2020 Furniture Design, you agree to our standard Terms & Conditions, available on request or via our website.
- All prices are quoted in GBP and exclude VAT unless otherwise stated.

Delivery & Lead Times

- Pricing excludes delivery and installation unless specified within the quotation.
- Standard lead time for products within our RRP collection is approximately 4–6 weeks, subject to availability and seasonal demand.
- Bespoke products and customised finishes may require extended lead times depending on specification and project scope.
- During peak periods, including summer months, lead times may vary. Please contact your account manager for current production schedules.
- If shorter lead times are required, please speak with your account manager to discuss available options.

Delivery & Installations

- Installation services are available upon request and are quoted separately for each project.
- Where installation is carried out by 2020 Furniture Design, clear and unrestricted site access must be provided prior to the agreed installation date.
- Any preparatory works, including electrical works, site clearance or building works, remain the responsibility of the client. Delays or incomplete preparation may result in additional charges.
- Selected collections and bespoke projects must be delivered and installed exclusively by the 2020 Furniture Design installation team.

Warranty

- All products are covered by a 5-year warranty under normal fair wear and tear conditions.
- This warranty covers structural frames, foam and padding materials.
- Fabrics are covered under the respective manufacturer's warranty, typically 5 years depending on fabric selection.
- Electrical components, power modules and integrated charging solutions are covered by a 1-year warranty.
- Moving components and consumable parts, including hinges and door mechanisms, are covered by a 1-year warranty.
- Expected product lifecycle is approximately 15 years under normal commercial use conditions.

Care & Maintenance

To preserve the appearance and longevity of the product, regular maintenance and appropriate cleaning methods are recommended.

- Vacuum upholstery regularly to remove dust and dirt
- Clean spills immediately to prevent staining
- Avoid abrasive cleaners and harsh chemicals
- Use a soft damp cloth for laminate and hard surfaces
- Professional upholstery cleaning is recommended periodically
