n-ally

N-ally is a collection that understands how people actually use a space – not how they are supposed to use it.

Built from a broad family of curved and straight modules, booths, high-back screens and occasional tables, N-ally gives specifiers the tools to shape breakout areas, reception zones and collaborative spaces that feel genuinely inviting rather than merely furnished.

Available in low, mid and high back heights, with straight and curved formats, N-ally works with the architecture rather than against it.

Designed to feel natural. Built to perform.

Designed by 2020FD.

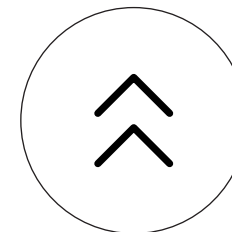

Crafted with care. Designed for people.

The spaces where people feel most at ease are rarely the ones that shout the loudest. They are the ones that get the details right - the seat depth, the back height, the way one piece connects to the next.

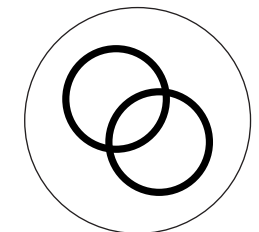

N-ally was designed with those details in mind. Its softly upholstered forms and considered proportions create a sense of ease the moment someone walks into the room. The rounded geometry softens the edges of commercial interiors without losing the structure that makes a space feel organised and purposeful.

Available across 38 configurations - from a single stool to a six-seater high-back booth with integrated table - N-ally scales to whatever the project demands. Optional integrated USB ports keep users connected, and the broad choice of wool-rich upholstery fabrics ensures every installation can be tailored to its environment.

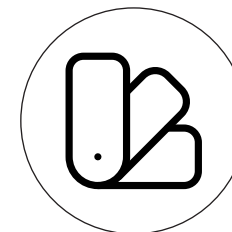

Comfortable from every angle. Consistent across every piece.

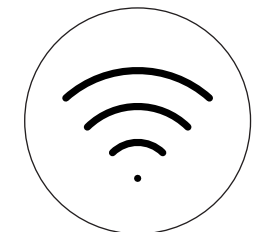

Specified in low, mid or high back heights for privacy and acoustic separation.

Available in curved and straight formats to suit any floorplan.

Best specified in wool-rich upholstery fabrics for a premium finish and long-term durability.

Optional integrated USB ports keep users connected throughout the day.

n-ally

Manifest

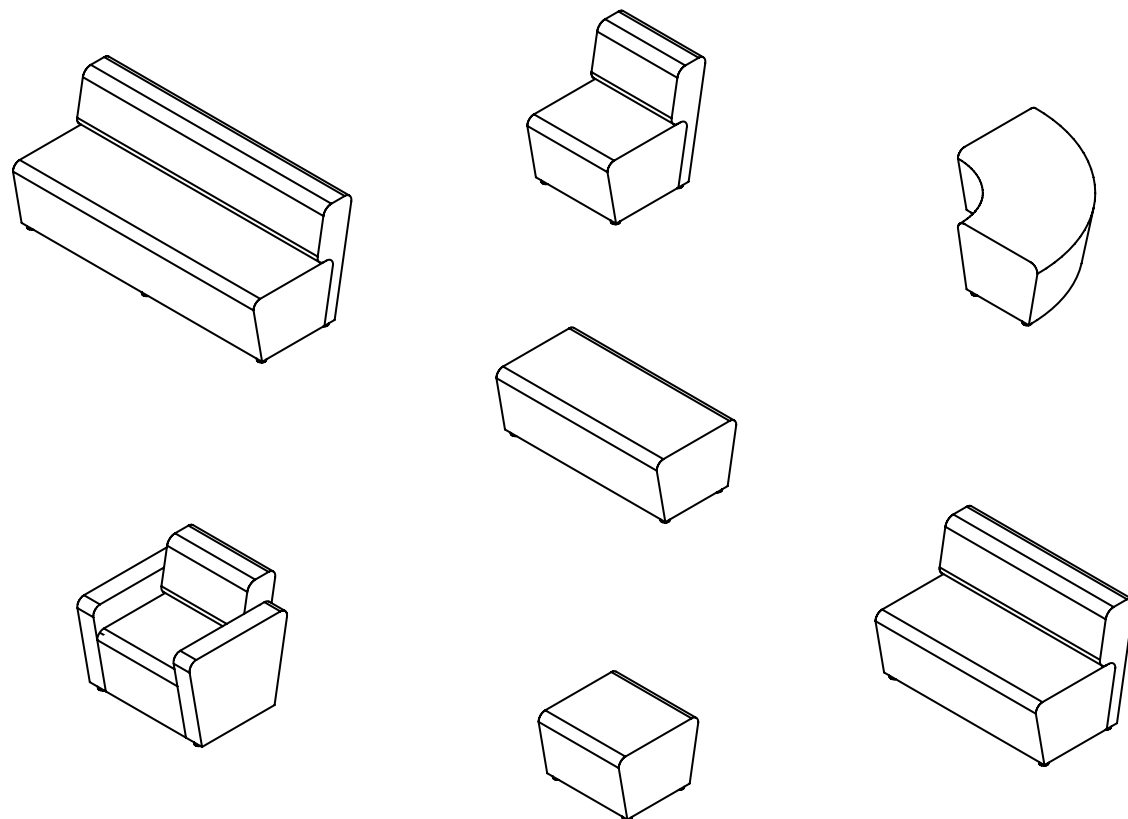

The most important thing a breakout space can do is make someone want to use it.

Not because the calendar says so. Not because there is nowhere else to go. But because the space itself feels right - comfortable, unhurried, a little removed from the noise of the working day.

N-ally was designed to create that feeling. Each piece carries the same quiet character - soft edges, generous proportions, upholstery that rewards the choice to sit down for a while. Together, they build environments that feel less like contract furniture and more like somewhere a person might actually choose to spend time.

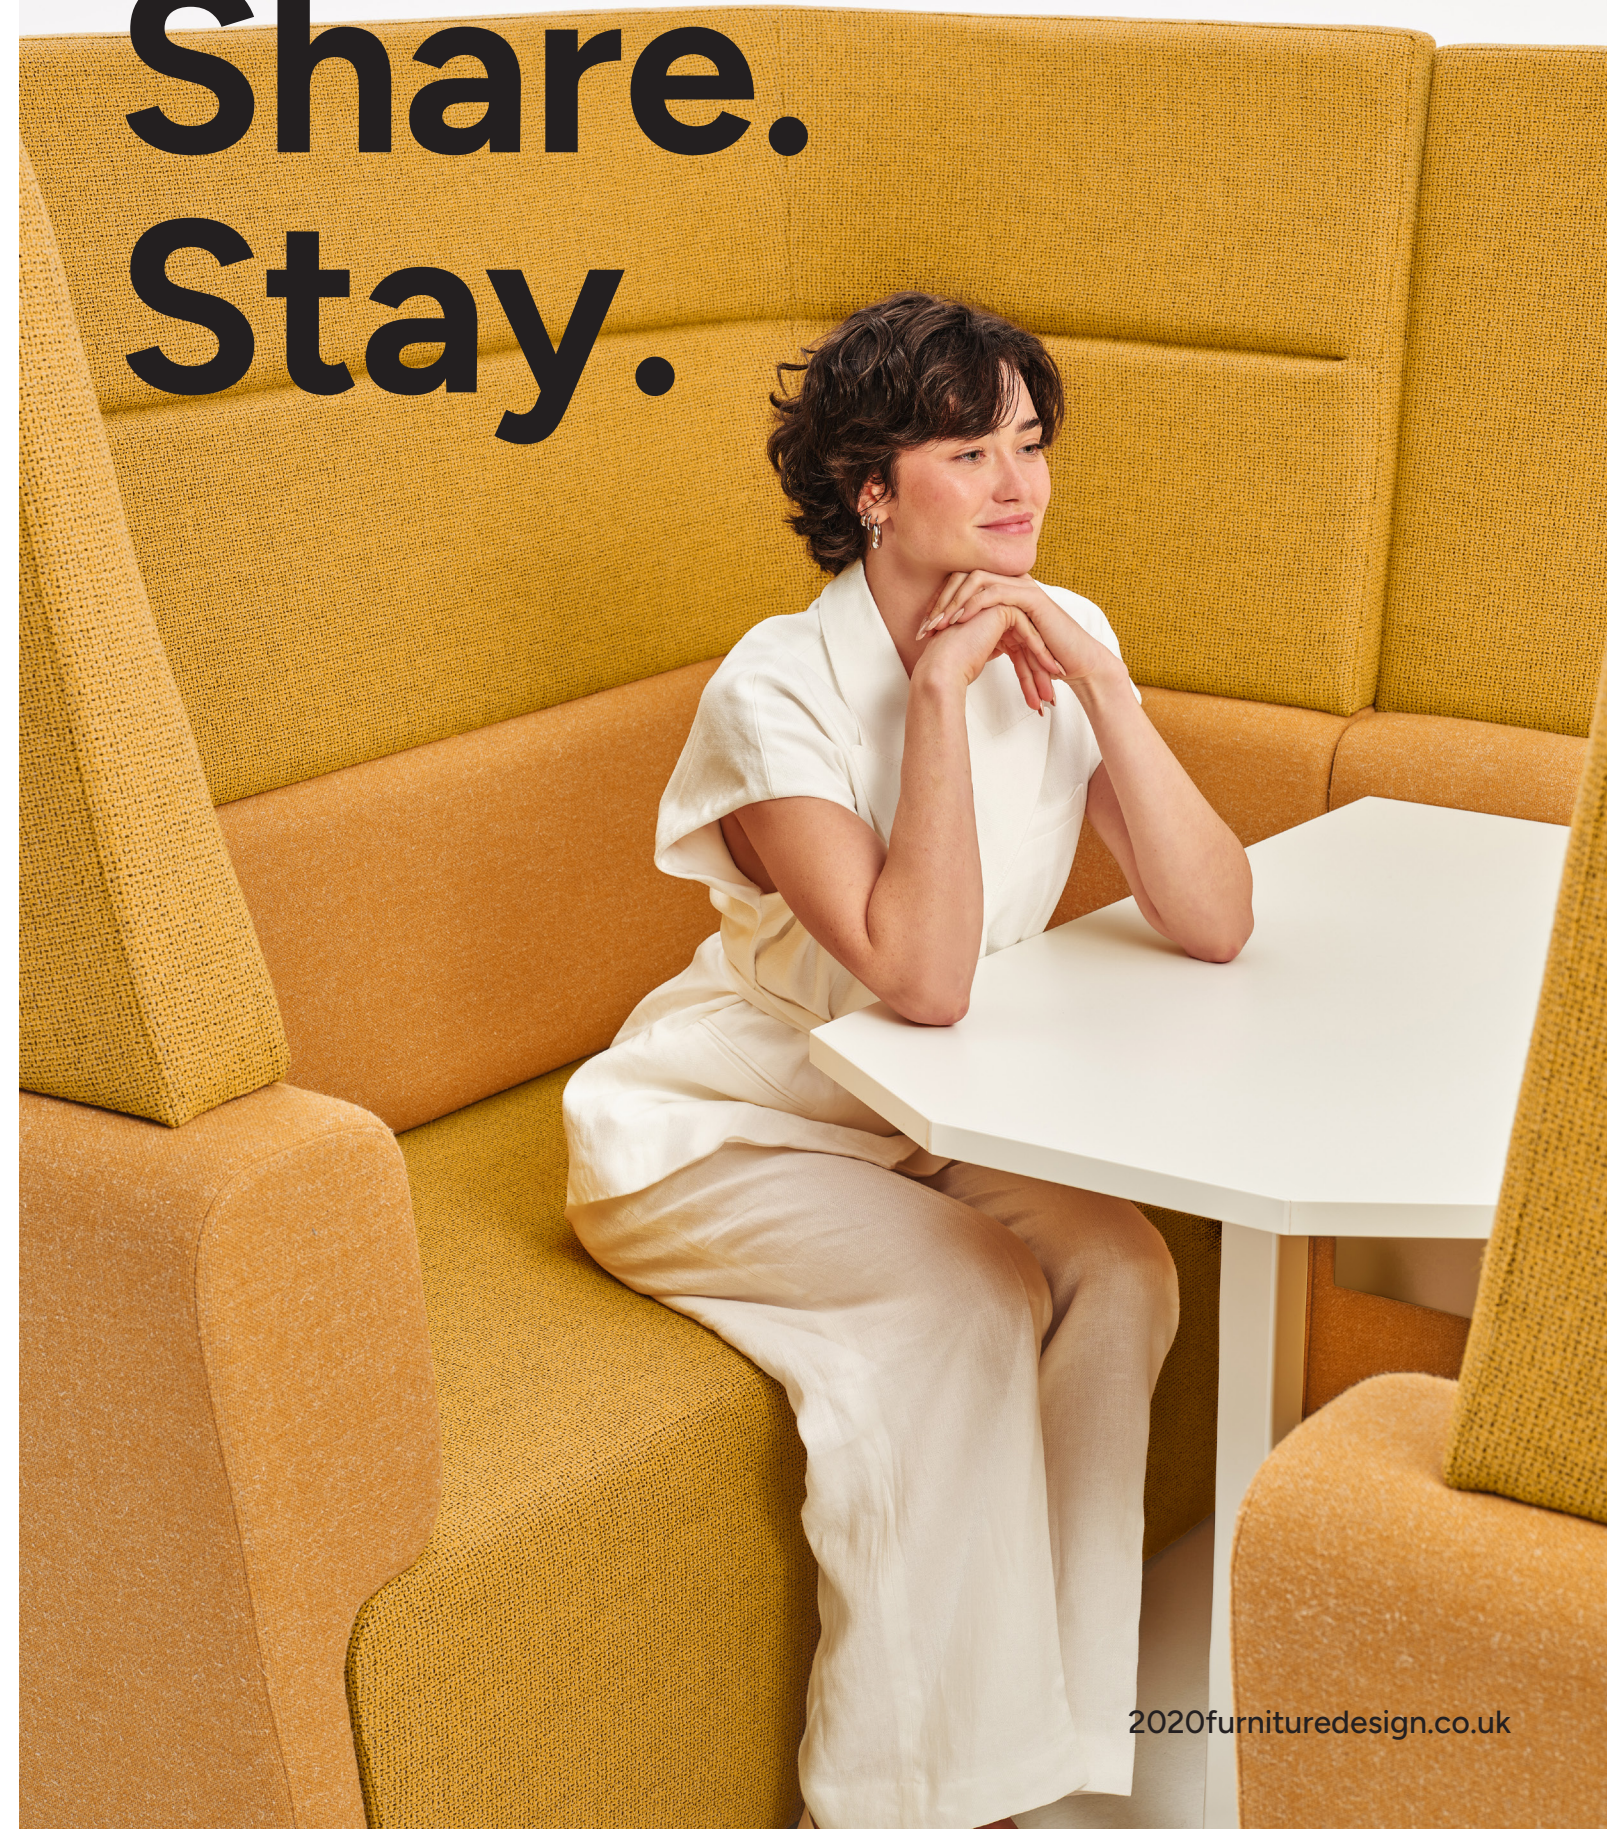

The collection spans stools, chairs, sofas, high-back booths and wrap-around pieces, all sharing the same design language and connecting seamlessly into larger configurations. Whether the brief calls for a single statement piece in a reception area or a complete breakout landscape across an open floor, N-ally delivers the same calm coherence at every scale.

Quiet by nature. Considered by design.

FURNITURE DESIGN

Sit. Share. Stay.

2020furnituredesign.co.uk

Built around everyday moments.

Some of the most valuable moments in a working day are the smallest ones.

A conversation that starts a project. A five-minute pause that clears the head. An impromptu meeting that does not need a room. N-ally was designed to support all of these — providing the right kind of space for the right kind of moment, without requiring anyone to plan ahead or book a slot.

The collection works equally well as a single chair beside a window or as a fully configured booth landscape accommodating a dozen people at once. Its organic, upholstered forms introduce warmth and approachability to environments that can otherwise feel impersonal, while the range of back heights and configurations ensures that every installation serves a genuine purpose.

Designed to be used. Every day.

Why modular?

Modular

N-ally is not a sofa. It is not a chair. It is a system - one that gives designers and specifiers the freedom to build exactly the environment the project needs.

The collection spans 38 individual pieces: straight and curved stools, low and high back chairs and sofas, corner connectors, curved units, Y-shaped clusters and fully enclosed high-back booths seating two, four or six people with integrated tables. Each piece shares the same upholstery language and seat height, allowing configurations to grow from a single unit to a large-scale installation without losing coherence.

High-back versions reaching 1460mm and 1555mm introduce meaningful acoustic separation - effective in open-plan environments where enclosure is needed without the cost of built partitions.

Straight and curved formats mix freely, following the geometry of any space.

Soft by design. Endlessly configurable.

Spaces

N-ally belongs wherever people gather — formally or otherwise.

In a corporate office, high-back booth configurations create focused meeting zones within open-plan floors, while low and mid-back versions define softer breakout areas where people can decompress or catch up.

In education environments, N-ally's durability and broad upholstery choice make it well suited to student social spaces, library breakout zones and faculty common rooms that see heavy daily use.

In healthcare and public spaces, approachable geometry and robust construction make it a natural fit for waiting areas where comfort and durability matter equally.

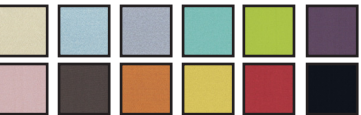

From a single piece to a complete landscape - N-ally shapes the space around the people who use it.

Choose your own

Our upholstery collection is structured to provide clarity and flexibility in material selection. Fabrics are divided into two categories: Band 1 and Band 2, allowing projects to meet both aesthetic and performance requirements.

Band 1 offers a versatile range of high-quality fabrics that balance durability, functionality, and visual appeal. These materials deliver reliable performance with a refined finish. Band 2 features a selection of premium textiles with richer textures, enhanced tactility, and expanded color options-ideal for n-allye sophisticated interiors.

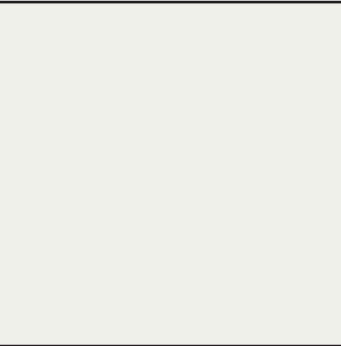

The collection also includes screen fabrics for vertical applications such as acoustic panels and privacy screens, ensuring both performance and visual consistency.

Selected finishes are available in vinyl, offering resistance to moisture, staining, and intensive use-ideal for high-traffic environments requiring easy maintenance without compromising design quality.

Our products are built using carefully selected materials that combine visual quality with functional performance. We utilize MFC boards along with layered, sound-absorbing structures and soft textile finishes to help reduce unwanted sound reflections from surrounding surfaces such as walls, furniture, and glazing.

The material composition is designed to support speech clarity and everyday comfort, minimizing background noise and improving the overall acoustic experience of the space.

Choose your own

You can choose from a wide range of finishes and material options to match your project's character and design direction. We use a selection of high-quality MFC boards from trusted suppliers, ensuring durability, consistency, and a refined appearance across all elements.

In addition to the standard finishes, custom materials and colors can be provided upon request. For larger or n-alley specific projects, we are able to source and prepare tailored solutions based on the client's needs and preferred aesthetics.

Before you order

General

- By placing an order with 2020 Furniture Design, you agree to our standard Terms & Conditions, available on request or via our website.
- All prices are quoted in GBP and exclude VAT unless otherwise stated.

Delivery & Lead Times

- Pricing excludes delivery and installation unless specified within the quotation.
- Standard lead time for products within our RRP collection is approximately 4–6 weeks, subject to availability and seasonal demand.
- Bespoke products and customised finishes may require extended lead times depending on specification and project scope.
- During peak periods, including summer months, lead times may vary. Please contact your account manager for current production schedules.
- If shorter lead times are required, please speak with your account manager to discuss available options.

Delivery & Installations

- Installation services are available upon request and are quoted separately for each project.
- Where installation is carried out by 2020 Furniture Design, clear and unrestricted site access must be provided prior to the agreed installation date.
- Any preparatory works, including electrical works, site clearance or building works, remain the responsibility of the client. Delays or incomplete preparation may result in additional charges.
- Selected collections and bespoke projects must be delivered and installed exclusively by the 2020 Furniture Design installation team.

Warranty

- All products are covered by a 5-year warranty under normal fair wear and tear conditions.
- This warranty covers structural frames, foam and padding materials.
- Fabrics are covered under the respective manufacturer's warranty, typically 5 years depending on fabric selection.
- Electrical components, power modules and integrated charging solutions are covered by a 1-year warranty.
- Moving components and consumable parts, including hinges and door mechanisms, are covered by a 1-year warranty.
- Expected product lifecycle is approximately 15 years under normal commercial use conditions.

Care & Maintenance

To preserve the appearance and longevity of the product, regular maintenance and appropriate cleaning methods are recommended.

- Vacuum upholstery regularly to remove dust and dirt
- Clean spills immediately to prevent staining
- Avoid abrasive cleaners and harsh chemicals
- Use a soft damp cloth for laminate and hard surfaces
- Professional upholstery cleaning is recommended periodically
