session

session

Collection of modular seating and acoustic booths designed to support focused work, informal meetings, and quiet moments in shared spaces.

Clean geometry, soft materials, and integrated comfort create an environment that balances privacy with openness.

Designed by 2020FD.

Crafted with care. Designed for people.

Session is a collection of acoustic workplace solutions designed from the ground up around people - their senses, emotions, and everyday work rhythms.

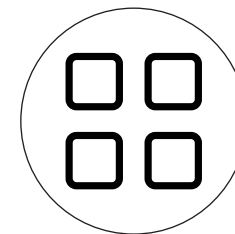

A system of booths and modular elements creates a coherent design language: soft geometries, tactile upholstery, and a carefully curated, monochromatic palette that brings clarity to space while making it feel more human.

The collection works within the architecture of the interior, smoothing sound reflections exactly where they occur - around workstations, in circulation areas, and within meeting zones.

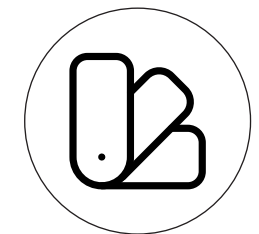

This reduces noise, lowers cognitive fatigue, and supports focus, creating a calm and balanced environment for both individual work and collaboration.

Session integrates focus spaces, collaboration zones, and areas for retreat into one adaptable system. The result is a flexible workspace that can evolve seamlessly with the needs of a team, supporting dynamic and modern ways of working.

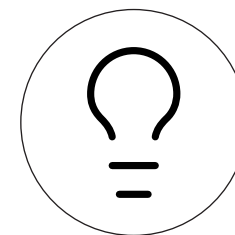

Designed for 2020 Furniture Design, Session combines the principles of neurodesign with precision manufacturing. It is more than furniture.

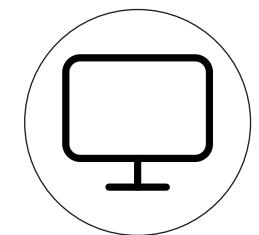

Soft upholstered internal panels paired with a choice of MFC or fully upholstered exterior finishes to suit any workspace.

Available as 1, 2, 4 and 6 person booths with the option of acoustic glazed doors for enhanced privacy.

Optional PIR sensor, LED lighting and ventilation provide a comfortable, energy-efficient working environment.

Optional power modules and TV bracket support presentations, video calls and modern hybrid working.

session

Control. Dialogue. Focus.

Work takes many forms. People focus, think, and collaborate in different ways. Session adapts to them - never the other way around.

Sound matters. Each booth is designed to control acoustics at the source, reducing reflections where they occur. Less reverberation. Clearer speech. Deeper focus.

Touch matters too. Materials are carefully selected to feel as good as they look - soft where you lean, warm in perception, and durable where performance is essential.

Workspaces evolve, and Session evolves with them. A modular system of acoustic booths supports a wide range of scenarios - from individual focus to meetings and collaboration - adapting effortlessly to changing needs.

Clarity over noise. Clean forms, refined detailing, and a calm visual language create environments where people and ideas take priority.

Design is not decoration - it is a tool. Every element of Session is shaped to support comfort, concentration, and meaningful interaction.

session

Spaces

session creates a controlled acoustic environment within the workspace — reducing noise at its source, softening sound reflections, and improving speech clarity. The result is less cognitive fatigue, better focus, and a more comfortable way to work. Its modular design adapts effortlessly to changing needs, supporting both individual focus and collaborative interaction.

Tables

Tables by 2020 Furniture Design are conceived as a natural extension of every furniture collection in our portfolio. Regardless of the chosen line – from modern office systems to lounge and booth solutions – each table is carefully designed to complement its surroundings, maintaining a consistent aesthetic and unified design language.

Our tables stand out with their clean, minimalist form and attention to detail, making them ideal for collaborative workspaces, meeting areas, and informal settings. They are built to withstand intensive, everyday use, offering durability, ergonomics, and a timeless visual appeal.

Tabletops can be individually configured to meet specific project requirements. Upon request, they can be equipped with integrated functional modules, including:

- 230V power sockets,
- USB ports for charging mobile devices,
- signal connections (e.g. HDMI, RJ45),
- cable management solutions that help keep the workspace organized and visually clean.

This flexibility ensures that 2020 Furniture Design tables not only deliver refined aesthetics but also support efficient and comfortable work in contemporary office environments.

Additional elements

PIR sensor

Integrated motion sensor enables automatic control of lighting, improving energy efficiency and user convenience.

Lighting (Pendant Lamp or LED)

Choice of atmospheric pendant lighting or integrated LED illumination ensures optimal working conditions and a comfortable ambience.

TV Bracket

Robust and discreet wall-mounted solution designed for secure installation of televisions within the booth. Ensures stable positioning while maintaining a clean and integrated look of the interior.

Power & Connectivity Modules

Integrated power modules designed for seamless installation within the desk, providing convenient and discreet access to essential connections in the booth workspace. The solution enhances comfort while maintaining a clean, uncluttered aesthetic.

Configuration options include:

- 1–4 power points (customizable)
- AC sockets
- USB smart charging
- HDMI connectivity
- CAT-6 data ports

The system is designed with flexibility in mind and can be tailored to project requirements. This ensures compatibility with a wide range of devices and supports both everyday and more advanced technological needs, creating a functional and future-ready workspace environment.

Choose your own

Our upholstery collection is structured to provide clarity and flexibility in material selection. Fabrics are divided into two categories: Band 1 and Band 2, allowing projects to meet both aesthetic and performance requirements.

Band 1 offers a versatile range of high-quality fabrics that balance durability, functionality, and visual appeal. These materials deliver reliable performance with a refined finish. Band 2 features a selection of premium textiles with richer textures, enhanced tactility, and expanded color options-ideal for more sophisticated interiors.

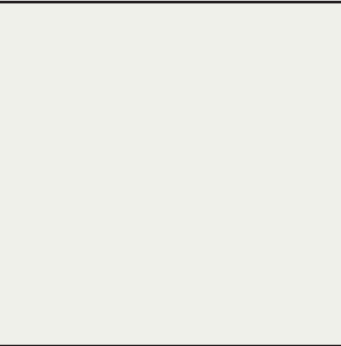

The collection also includes screen fabrics for vertical applications such as acoustic panels and privacy screens, ensuring both performance and visual consistency.

Selected finishes are available in vinyl, offering resistance to moisture, staining, and intensive use-ideal for high-traffic environments requiring easy maintenance without compromising design quality.

Our products are built using carefully selected materials that combine visual quality with functional performance. We utilize MFC boards along with layered, sound-absorbing structures and soft textile finishes to help reduce unwanted sound reflections from surrounding surfaces such as walls, furniture, and glazing.

The material composition is designed to support speech clarity and everyday comfort, minimizing background noise and improving the overall acoustic experience of the space.

Choose your own

You can choose from a wide range of finishes and material options to match your project's character and design direction. We use a selection of high-quality MFC boards from trusted suppliers, ensuring durability, consistency, and a refined appearance across all elements.

In addition to the standard finishes, custom materials and colors can be provided upon request. For larger or more specific projects, we are able to source and prepare tailored solutions based on the client's needs and preferred aesthetics.

Before you order

General

- By placing an order with 2020 Furniture Design, you agree to our standard Terms & Conditions, available on request or via our website.
- All prices are quoted in GBP and exclude VAT unless otherwise stated.

Delivery & Lead Times

- Pricing excludes delivery and installation unless specified within the quotation.
- Standard lead time for products within our RRP collection is approximately 4–6 weeks, subject to availability and seasonal demand.
- Bespoke products and customised finishes may require extended lead times depending on specification and project scope.
- During peak periods, including summer months, lead times may vary. Please contact your account manager for current production schedules.
- If shorter lead times are required, please speak with your account manager to discuss available options.

Delivery & Installations

- Installation services are available upon request and are quoted separately for each project.
- Where installation is carried out by 2020 Furniture Design, clear and unrestricted site access must be provided prior to the agreed installation date.
- Any preparatory works, including electrical works, site clearance or building works, remain the responsibility of the client. Delays or incomplete preparation may result in additional charges.
- Selected collections and bespoke projects must be delivered and installed exclusively by the 2020 Furniture Design installation team.

Warranty

- All products are covered by a 5-year warranty under normal fair wear and tear conditions.
- This warranty covers structural frames, foam and padding materials.
- Fabrics are covered under the respective manufacturer's warranty, typically 5 years depending on fabric selection.
- Electrical components, power modules and integrated charging solutions are covered by a 1-year warranty.
- Moving components and consumable parts, including hinges and door mechanisms, are covered by a 1-year warranty.
- Expected product lifecycle is approximately 15 years under normal commercial use conditions.

Care & Maintenance

To preserve the appearance and longevity of the product, regular maintenance and appropriate cleaning methods are recommended.

- Vacuum upholstery regularly to remove dust and dirt
- Clean spills immediately to prevent staining
- Avoid abrasive cleaners and harsh chemicals
- Use a soft damp cloth for laminate and hard surfaces
- Professional upholstery cleaning is recommended periodically
